

UK IPv6 Council – BT/EE Update

Nick Heatley – Network Architect, BT / EE

BT IPv6 Consumer Broadband Rollout

- Network rollout completed October 2016
 - All BT Broadband lines support IPv6 with a compatible router, except legacy IPstream connections
 - Supported by the new BT Consumer Smart Hub 6 today

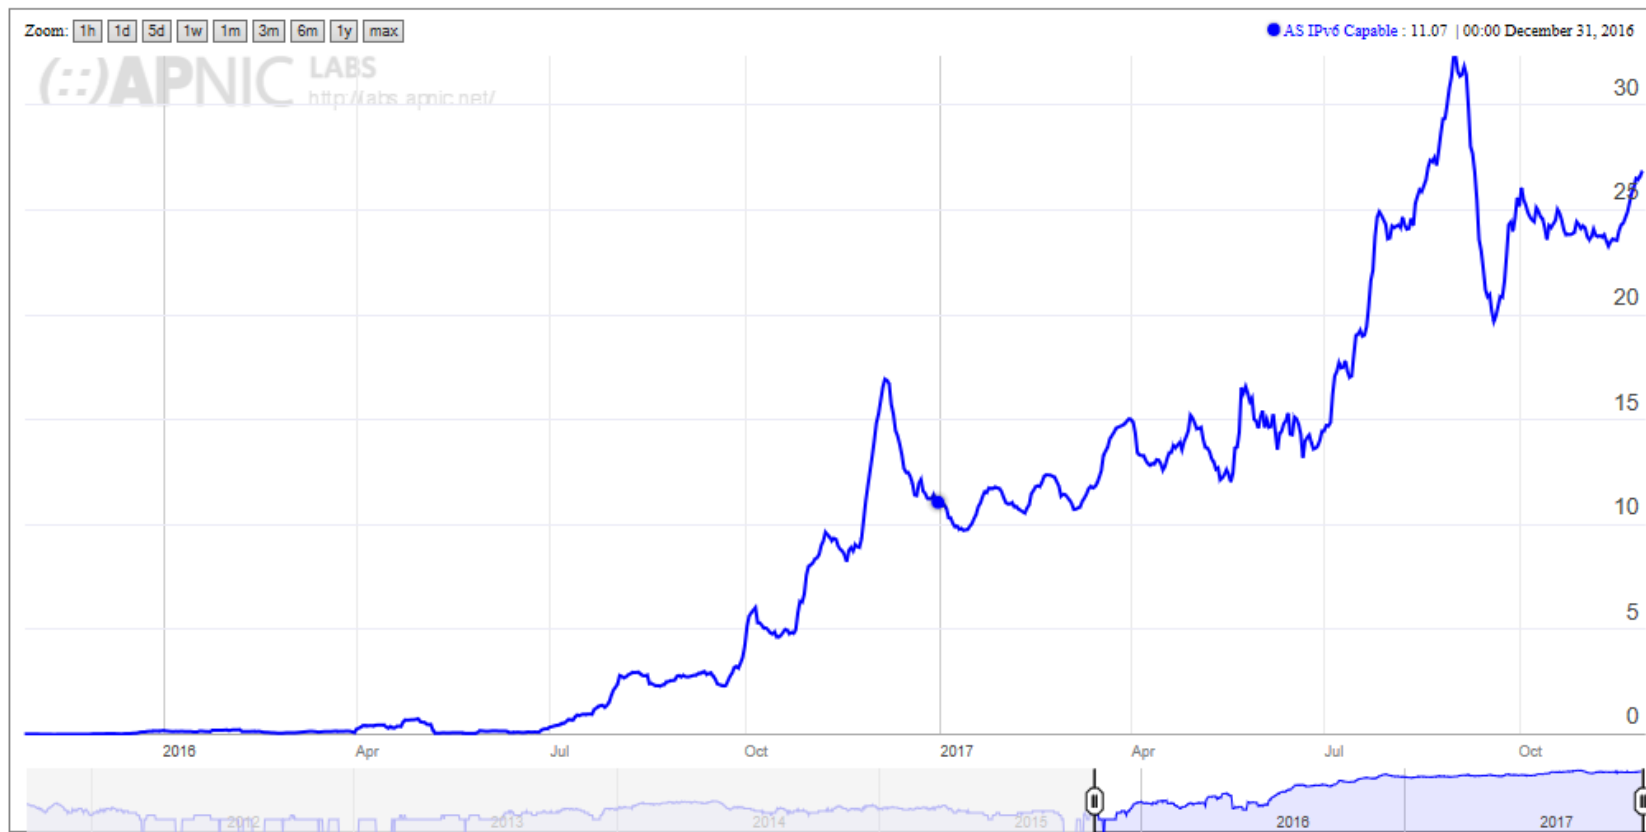

BT IPv6 Business Broadband Rollout

- BT Business Broadband support was added early this year
 - Business have a static IPv6 option (/56)
- High Speed Internet and VPN services have had IPv6 support for over 5 years

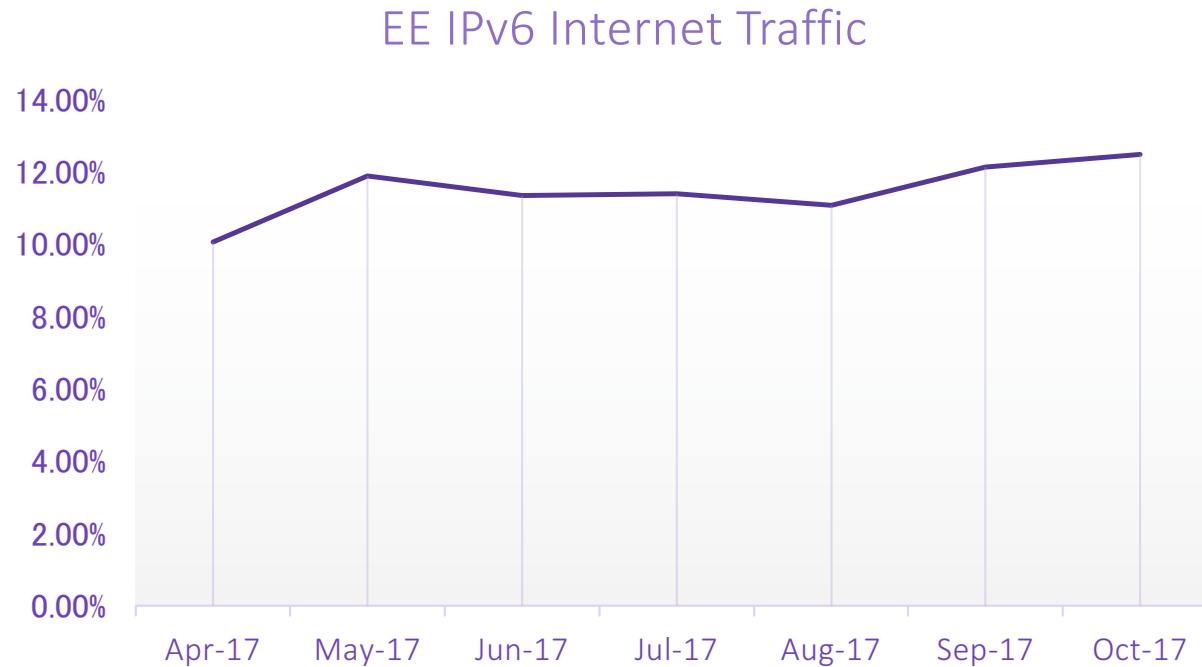

Take up of IPv6 - BT

EE Update

IPv6 Internet Traffic - EE Mobile

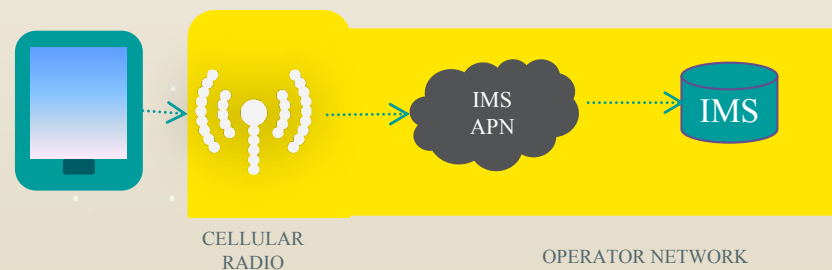

- IPv6-only launched at the end of 2016
- EE Consumers postpay with eligible handsets
- You won't see this in public v6 stats (they track the AS which, in the case of EE is a mix of fixed and mobile)

IPV6-ONLY @ EE

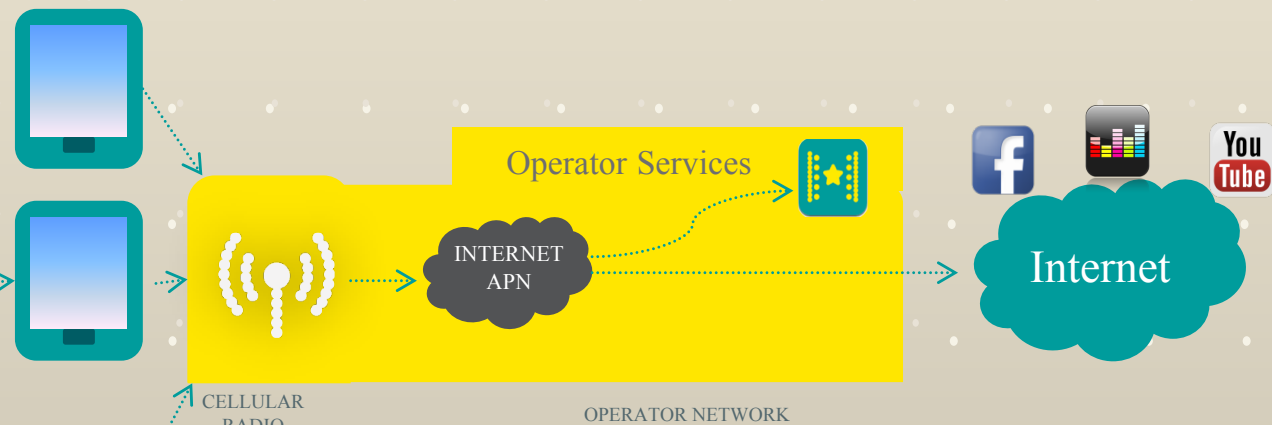

1. Voice/IMS

OPERATOR VOICE OVER IP
/ LTE / WIFI

2a. Data

DATA FROM INTERNET OR
OPERATOR SERVICE

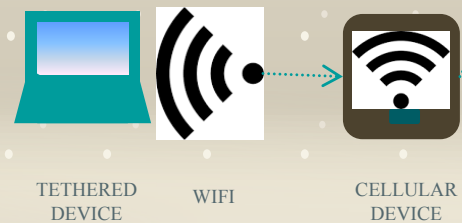

2b. Tethered Data

WIFI TETHERING FROM
HANDSET

3. Mobile Broadband

MYFI OR DONGLE

Thank you!
