

Africa's Cloud is Liquid.™

Liquid Telecom Overview

Mathew Chigwende
Catalin Petrescu

LIQUID
TELECOM

- Africa's largest independent fibre network which runs all the way from Cape Town to Cairo
- The network currently spans nearly 70,000km across borders.

Liquid Telecom Network

- Multivendor
- **One Network** across all operating countries
- Multiple metro network (one per operating countries)
- **IPv6** first approach; **IPv6** is not optional

IPv6 First ...

Dual stack network:

- Backbone
- In-country-Core
- In-country-Metro

IPv6:

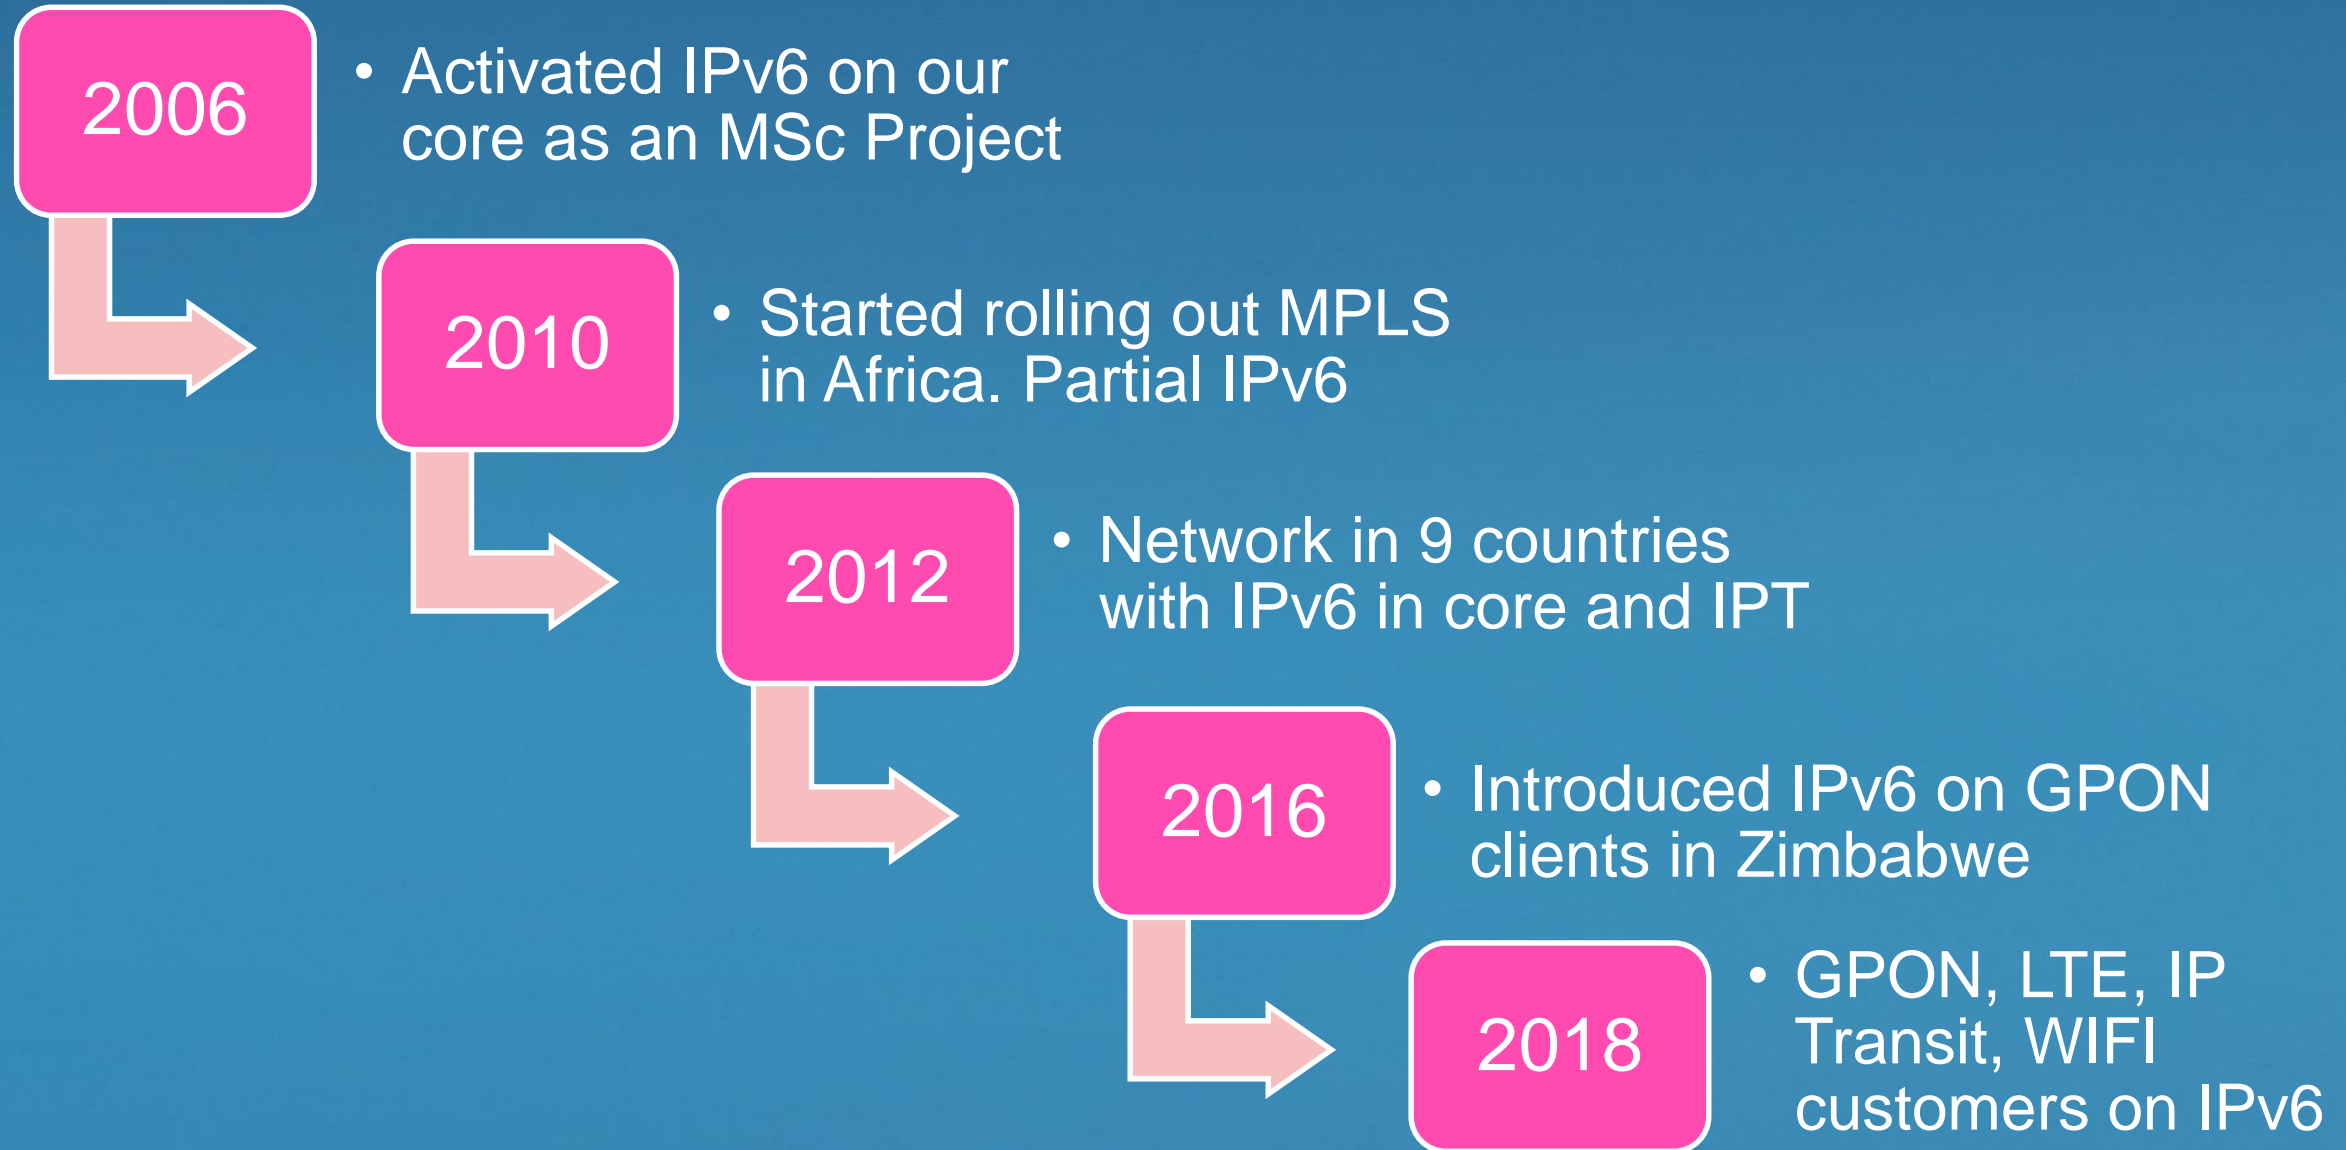

- ISIS Single Topology
- BGP IPv6
- SR-MPLS

IPv6

The Journey

Broadband Deployments

Two residential brands

- Kenya
- Rwanda
- Zambia
- Uganda
- Tanzania

- Zimbabwe

Broadband Deployments

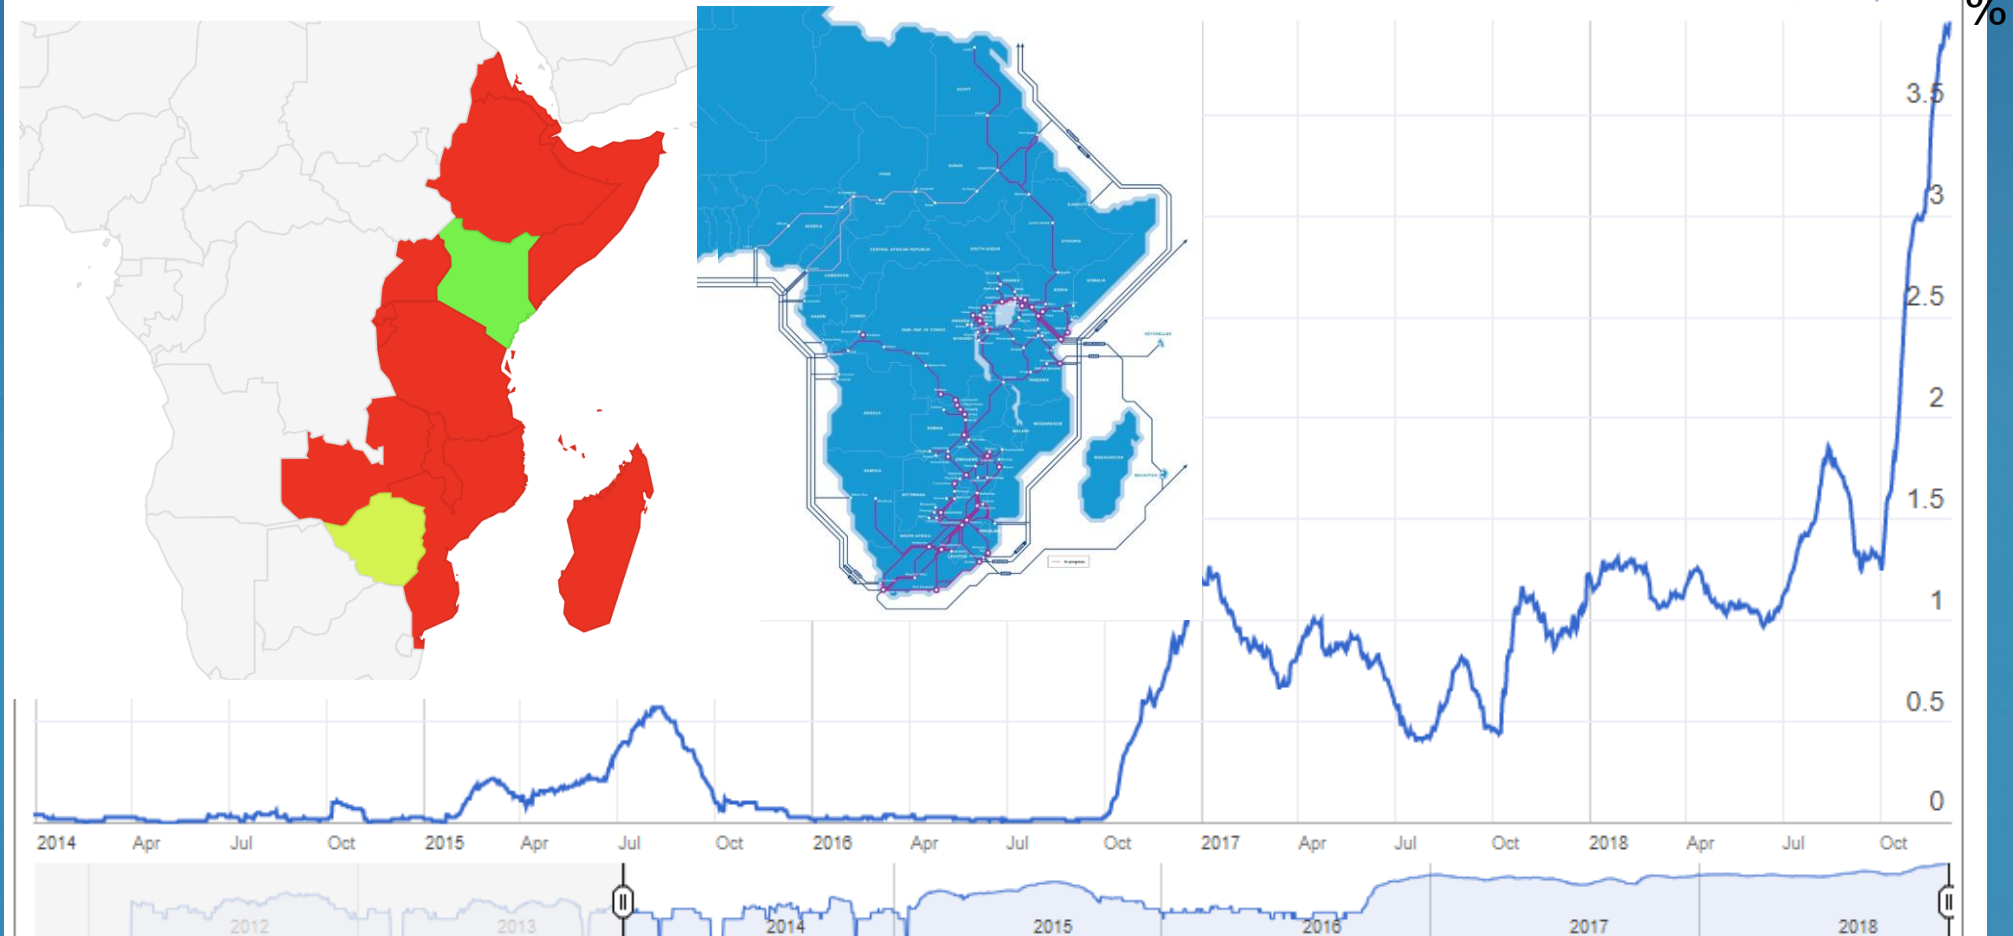

Across (3) Vendors' BNG

- Dual Stack
- PPPoE
- IPoE
- Translation on roadmap

Africa IPv6 Capability (%)

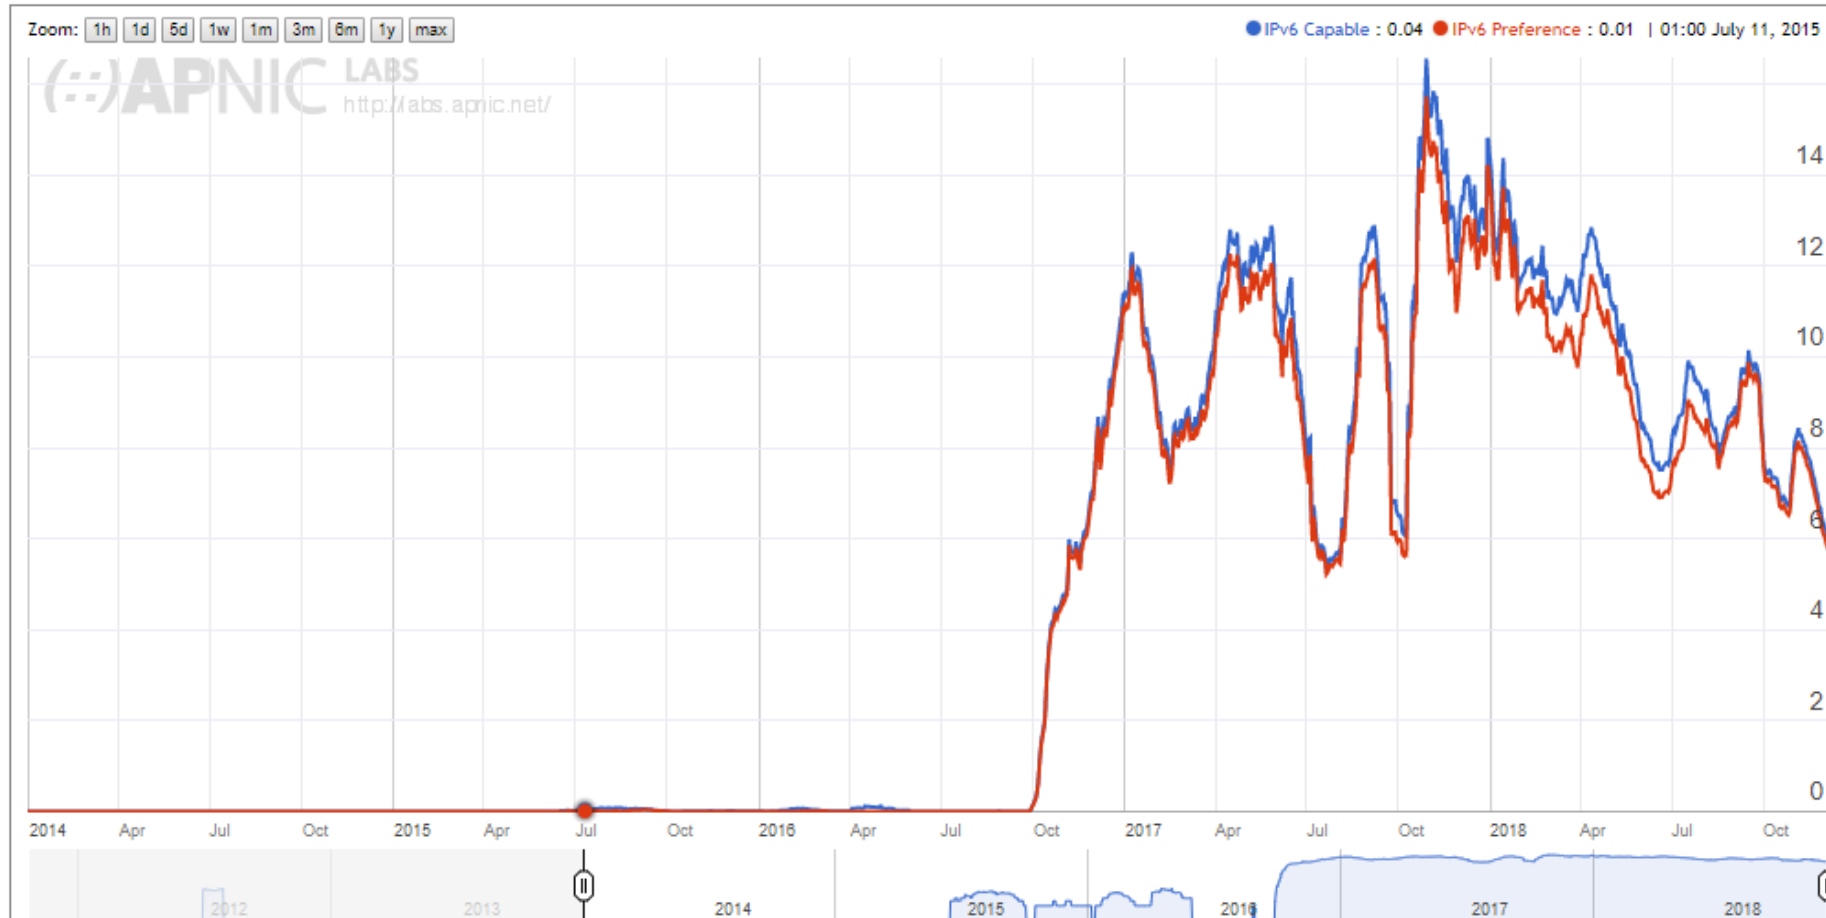

Use of IPv6 for Eastern Africa (XH)

Region Map for Eastern Africa (014)

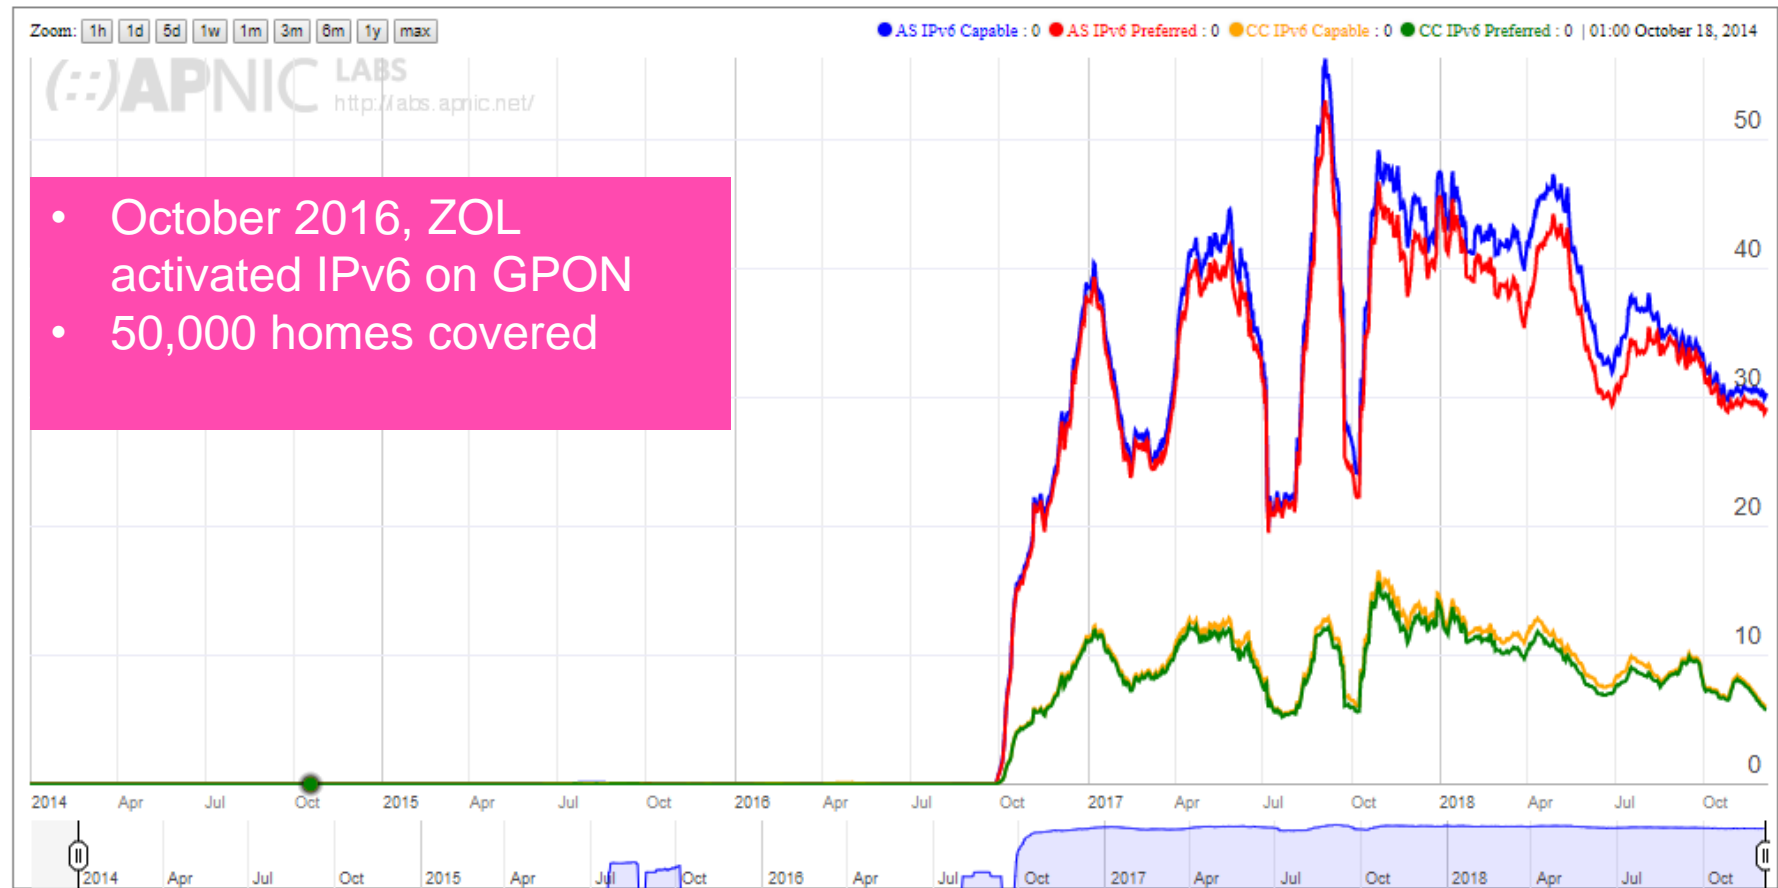

Zimbabwe Deployments (%)

Use of IPv6 for Zimbabwe (ZW)

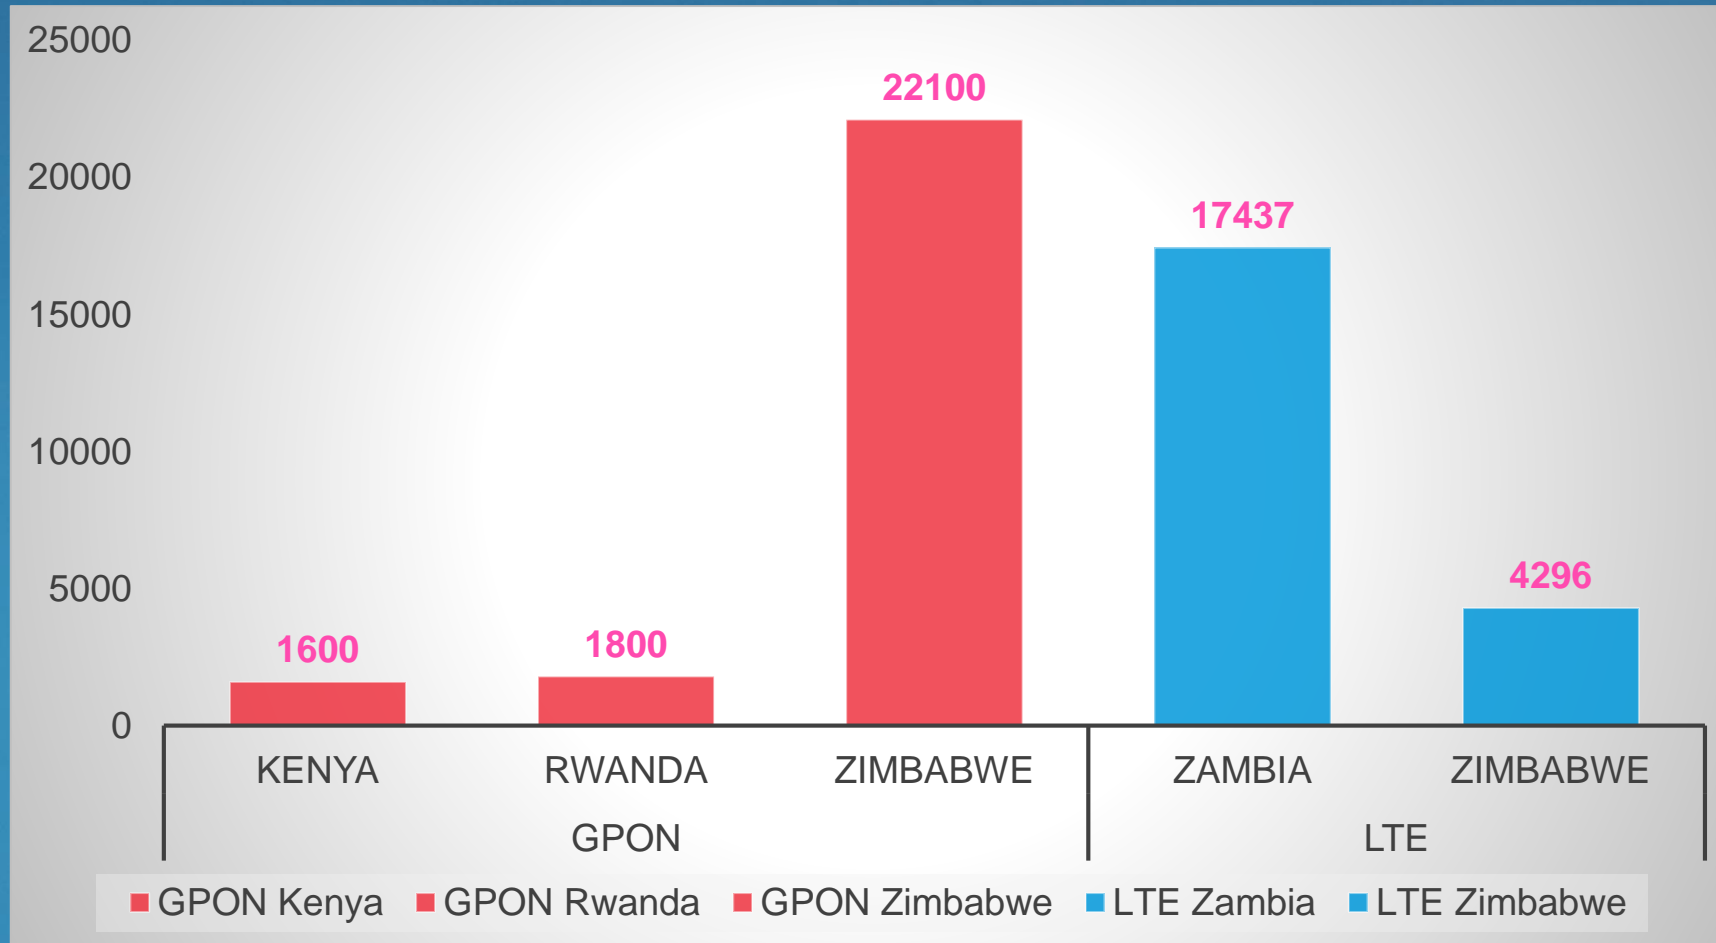

Liquid Telecom ZOL Deployments

IPv6 Per-Country Deployment for AS30969: ZOL-AS, Zimbabwe (ZW)

Liquid Telecom Deployments

Outlook

- Infrastructure growth
- IPv6 even more critical
- Follow technology

Africa's Cloud
is Liquid.TM
