

BT & EE Update UK IPv6 Council

12 December 2019

Nick Heatley, Network Architect, BT

IPv6 deployment in BT/EE

1

Dualstack for BT Consumer Broadband

All BT Broadband lines* completed October 2016, supported by BT Consumer Smarthubs today.

*Except legacy IPstream

2

Dualstack for BT Business Broadband

From 2017, Business have a static IPv6 option (/56). (High Speed Internet & VPN had v6 for several years)

3

IPv6-only for EE Voice (IMS and Voice-over-Wifi)

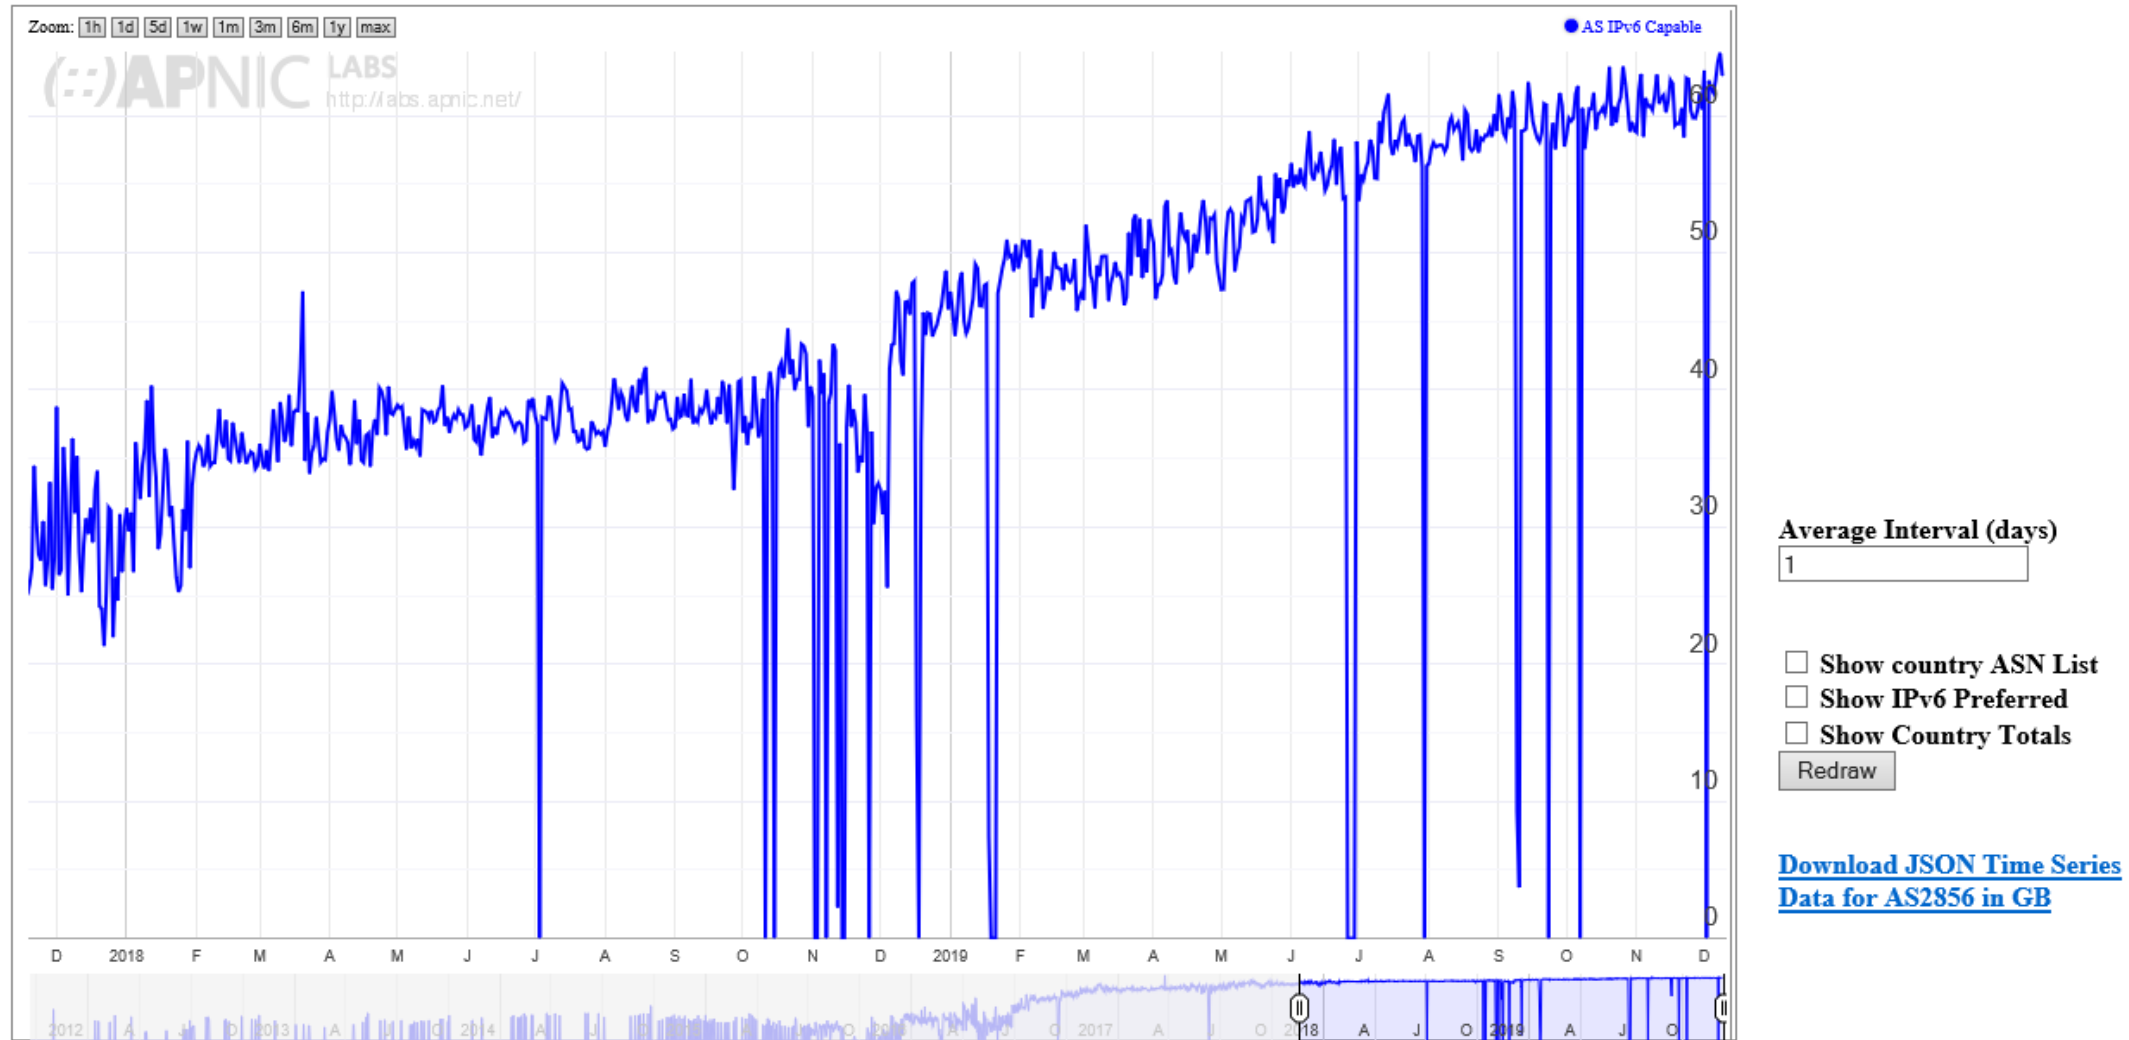

All Voice-over-LTE and Voice-over-Wifi via an IPv6 bearer.

4

IPv6-only for EE Handset Data

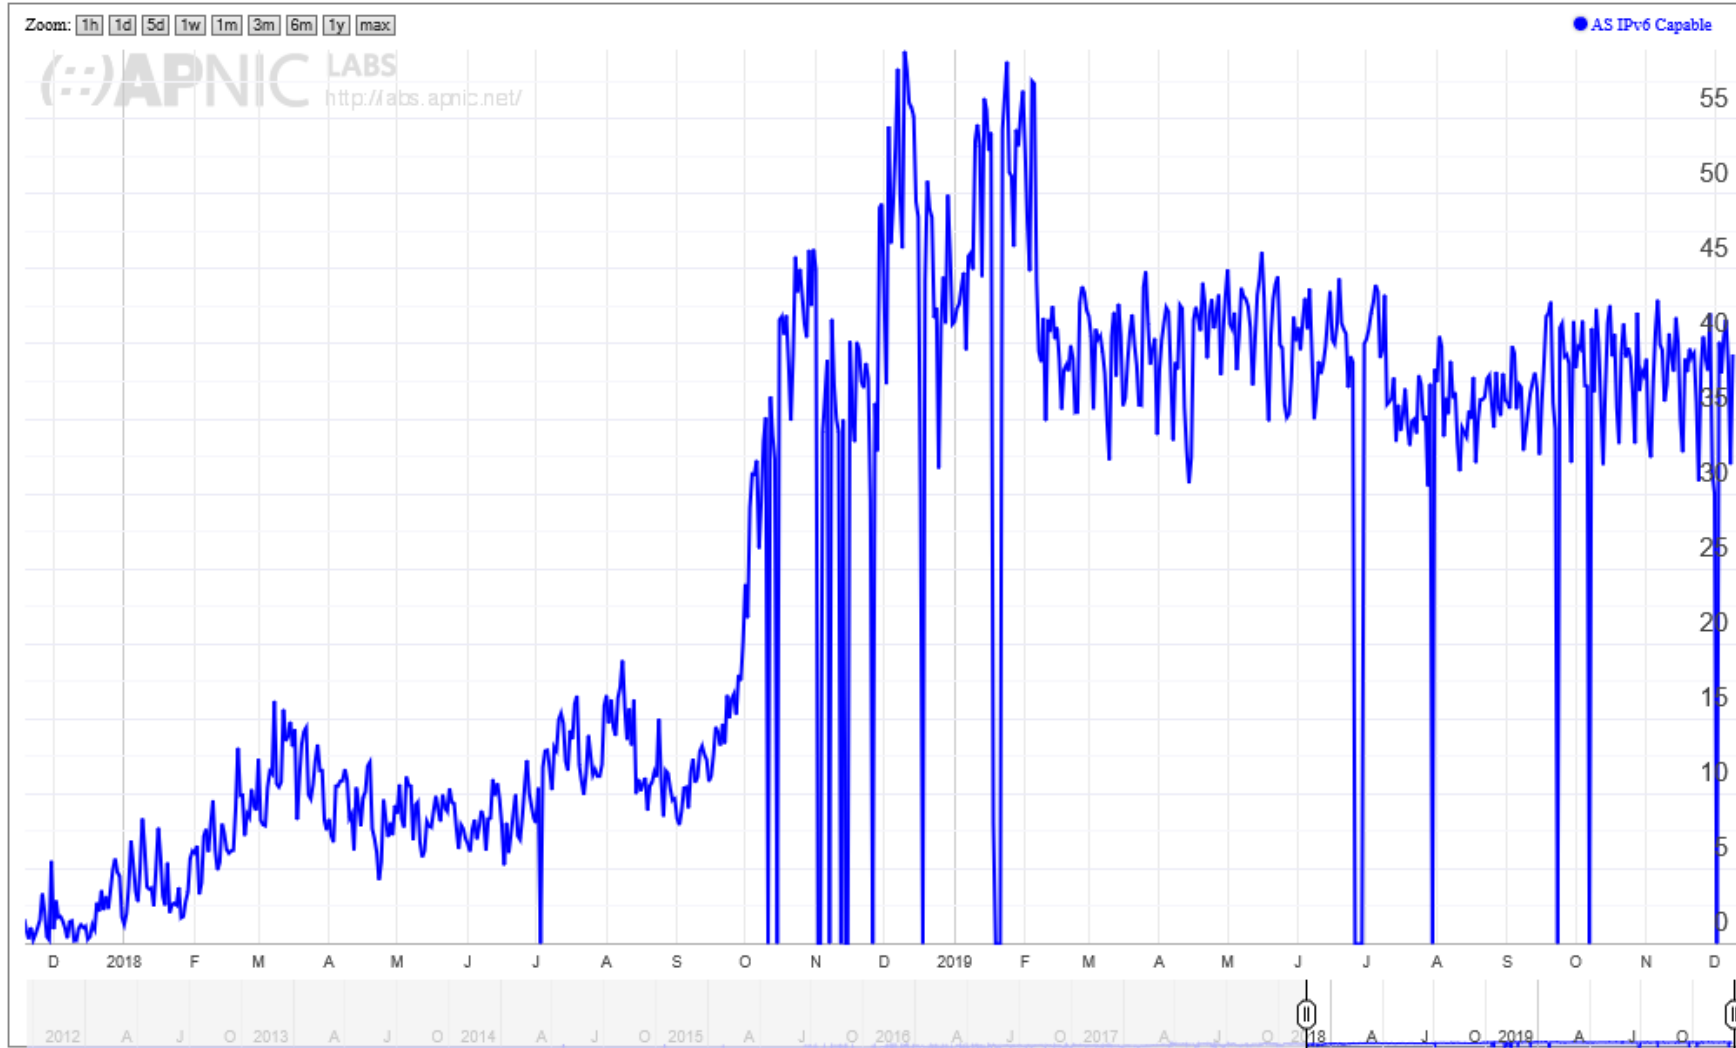

From late 2016, IPv6-only data services available to EE Postpay consumers with eligible device

IPv6 Per-Country Deployment for AS2856: BT-UK-AS BTnet UK Regional network, United Kingdom of Great Britain and Northern Ireland (GB)

BT

IPv6 Per-Country Deployment for AS12576: EE Ltd, United Kingdom of Great Britain and Northern Ireland (GB)

EE
